Installation Information

Item #P0678
Exposed Shower Set, 3 3/8" Centers

Warranted only if installed by a qualified licensed plumber.

1. **Shut off the water supply before installation.**
2. **Rough-in ½" Male IPS with ½" of threads past the finished wall at 3 3/8" centers.**
3. **Thread on the straight wall mount couplers to the ½" nipples extending out from finished wall, use Teflon paste or tape.**
4. **Connect the main valve body to the wall mount couplers.**
5. **Thread the shower arm into the 90 degree ball elbow using a clear two part epoxy.**
6. **Thread the 36" riser into the ball elbow using a clear two part epoxy, Insert the riser into the valve body and tighten the compression nut to seal the riser connection.**
7. **Attach the wall bracket escutcheon to the wall at desired height. *Wall support may need to be cut to length, cut non-threaded end only*. Secure to riser with the c-clamp provided.**
8. **Attach shower head to the shower arm using Teflon paste or tape.**
