Installation Information

P0679 - 12" Support Brace

1. **Assemble parts as shown below.**
2. **Measure from wall to supply line to get desired support length needed and cut only the non-threaded end of the rod accordingly. Re-install the C-clamp.**
3. **Attach the wall support escutcheon to the wall at desired height with the enclosed screws and anchors.**
4. **Attach the other side of the C-clamp and secure the two parts together with the supplied screws.**
