Installation Information

Item #P1087
Exposed Shower Set with 7” Centers

PLEASE NOTE BEFORE INSTALLATION: To insure proper installation, you must establish the installation location and the positioning of the valve unit and shower riser, taking into consideration the personal preferences of the user’s height, the ceiling height and any applicable local plumbing codes. Warranted only if installed by a qualified licensed plumber.

1. **Shut off the water supply before installation.**
2. **Rough-in ½” Male IPS with ½” of threads past the finished wall at 7” centers.**
3. **Thread on the straight wall mount couplers to the ½” nipples extending out from finished wall, use Teflon paste or tape.**
4. **Connect the main valve body to the wall mount couplers.**
5. **Insert the riser into the valve body and tighten the compression nut to seal the riser connection.**
6. **Attach the wall bracket escutcheon to the wall at desired height. Wall support may need to be cut to length, cut non-threaded end only. Secure to riser with the c-clamp provided.**
7. **Attach shower head to the shower arm using Teflon paste or tape.**

Parts Included:

(1) Thermostatic valve body
(1) 2” Wall Mount Coupler Pair
(1) 36” Hook Riser
(1) 12” Wall Support
(1) Shower Head

This faucet is tested to remain within 1 degree Fahrenheit of your desired setting throughout its operation, with an automatic temperature stop at 104 degrees Fahrenheit. The unit also has a built-in anti-syphon.

NOTE:
THIS UNIT IS NOT WARRANTED FOR OUTDOOR USE.
